Education

Bachelor of Computer Science | University of Jordan

2021 – 2025 | Amman, Jordan

- Gained a solid foundation in programming, algorithms, databases, software engineering, and computer systems.
- Completed hands-on projects in web development, data structures, and team-based software design.
- Developed strong analytical and problem-solving skills through coursework and practical assignments.
- Gained familiarity with the software development life cycle, including principles of software testing and quality assurance through coursework.

Experience

Software Development Intern | Microsystems

6.Apr.2025 – 31.May.2025 | Amman, Jordan

- Developed backend APIs using Node.js, Express, and MongoDB to handle database operations.
- Applied TypeScript and asynchronous programming to improve code reliability.
- Conducted API testing with Postman and verified data accuracy.
- Collaborated in a Git-based workflow and virtualized environment (VMware).
- Practiced QA basics including defect reporting and API validation.

Technical Skills

- Programming: C++, JavaScript, Node.js, TypeScript
- Web Development: HTML, CSS, REST APIs
- Databases: MySQL, MongoDB
- Tools: Git, GitHub, Postman, VS Code, IntelliJ, VMware
- Concepts: Data Structures & Algorithms, OOP, Agile & QA basics, Linux CLI

Projects

Hike Jo – Graduation Project

- Built a hiking trip platform with authentication, trip booking, and dashboards for companies.
- Designed database schema and integrated APIs for reservations and trip management.

Volunteering

Volunteer – iTeam (IT College Student Support Team)

University of Jordan | 2022 – 2025

- Assisted students with coding, software tools, and course materials.
- Helped organize IT workshops, hackathons, and knowledge-sharing sessions.
- Strengthened teamwork, mentoring, and communication skills within the student community.

Soft Skills

Problem-Solving | Team Collaboration | Time Management | Clear Communication | Fast Learner
